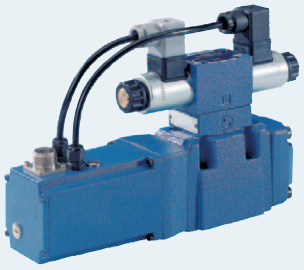
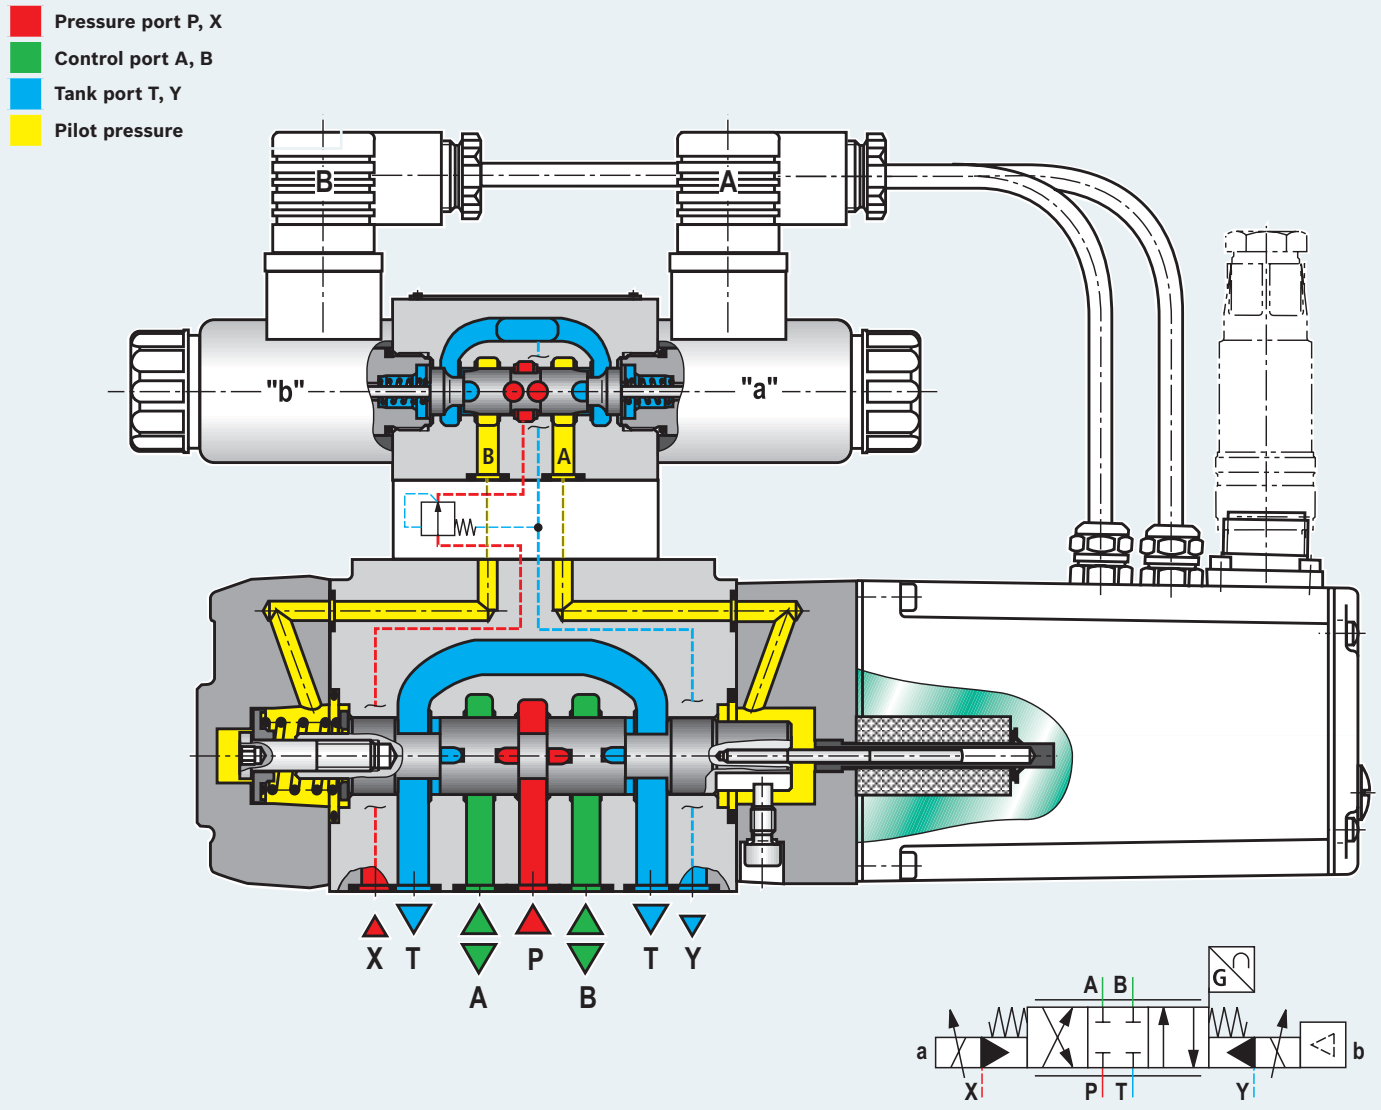
Proportional directional valve, pilot operated

Type 4WRKE





Features

- Proportioanl directional valve, pilot operated with electrical feedback of the spool position and integral control electronics
- Controls direction and volume of a flow

Technical Data

- Max. pressure:
  315 bar – size 10
  350 bar – size 16 to 32
- Max. flow 1600 l/min
- Max. hysteresis ≤1 %
